

Career Education

2-D Mechanical CAD Drafting

Computer-Aided Drafting and Design Technicians prepare detailed drawings based on rough sketches, specifications, and calculations made by scientists, engineers, architects, and designers. Certificates of proficiency are available for those students who desire preparation for more immediate entry into the workforce.

Certificate of Proficiency

2-D Mechanical CAD Drafting

Total Program = 8 Credit Hours

The fourth digit in the course number indicates the number of credit hours.

Requirements - 8 hours
